**Purafil's Christopher Muller to present at the
51st ISA Analysis Division Symposium**

DORAVILLE, Ga.—Purafil's Technical Services Director, Mr. Christopher Muller will be traveling to Anaheim, California on April 1 - 4, 2006 to present at the 51st Instrument Society of America (ISA) Analysis Division Symposium. This symposium will feature technical papers and presentations by experts in the field of various analyzer technologies. A member of the ISA – SP71 committee on Environmental Conditions for Process Measurement and Control Systems, Muller will be presenting a paper focusing on the use of nanostructures to detect and monitor corrosion.

Muller has served in Purafil's Technical Services Department for over 18 years and is responsible for technical support services and various research and development functions. Muller has written and spoken extensively on the subject of environmental air quality and the application/use of gas-phase air filtration and counts over 90 peer-reviewed papers and articles, more than 20 seminars and 7 handbooks to his credit. Muller received his Bachelor of Science degree in Applied Biology with a minor in Chemistry from Georgia Tech in 1979 and has done postgraduate work in Industrial Engineering.

For over 30 years Purafil has developed air-cleaning systems that eliminate, control and provide real-time monitoring of corrosive, odorous, hazardous and toxic gases. Purafil maintains nearly 20,000 installations in commercial, industrial and municipal environments worldwide.
