**Purafil, Inc. receives 2004 Clean Air Excellence Award  
from the Environmental Protection Agency (EPA)**

*Enersave™ Program and OnGuard® Monitors recognized  
for expertise in Clean Air Technology*

**DORAVILLE, GA** — Purafil, Inc. has been chosen to receive a 2004 Clean Air Excellence Award for its Enersave Program and OnGuard Monitors from the Environmental Protection Agency (EPA). Purafil receives recognition in the “Clean Air Technology” category, which acknowledges technological developments that reduce air pollution from either stationary, mobile or area sources.

EPA Administrator Stephen Johnson states, “Congratulations to the winners of the 5th Annual Clean Air Excellence Awards. Your innovative projects and creative programs demonstrate our national resolve for cleaner air and a healthier America. These unique contributions are an important part of air quality improvement across our nation. Thank you for your outstanding work and dedication.”

Enersave is an energy-savings program that reduces the need for outside air by as much as 75% in commercial buildings offering significant savings on energy and operational costs. Purafil’s OnGuard monitors are the world’s first and only instruments capable of providing continuous, real-time measurements of airborne corrosion levels.
