THE ROOM AIR PURIFIER - 750

THE PURAFIL ROOM AIR PURIFIER (RAP) is designed to remove odors and particulates commonly associated with "Sick Building Syndrome" (SBS) in single meeting rooms, waiting rooms, offices, and conference rooms. The RAP is not an electronic air cleaner and does not produce ozone or other harmful gases. The RAP keeps indoor air clean and odor-free reducing the need and expense of bringing in additional outdoor ventilation air.

THE PURAFIL
ROOM AIR PURIFIER

COMMON INDOOR POLLUTANTS:

The Room Air Purifier is effective in controlling hundreds of common indoor pollutants, including:

- Animal Odors
- Auto/Diesel Exhaust
- Mold/Mildew Odors
- Body Odors
- Tobacco Odors
- Cleaning Compounds
- Printing/Copying Odors
- SO₂, NO_x, HCHO, O₃
- Jet Exhaust Fumes
- Laboratory Odors
- Bathroom Odors
- Cooking Odors
- Hospital Odors

SYSTEM ADVANTAGES:

ELIMINATES ODORS: The RAP eliminates odors (i.e., formaldehyde and tobacco smoke) and particulates that have been identified as the cause of SBS. Occupants suffering from SBS complain of eye, nose, and throat irritations, headaches, fatigue and reduced concentration. Designed to eliminate both airborne particulates and gaseous odors, the RAP offers a full charge of dry-scrubbing media manufactured by Purafil, Inc. The RAP helps indoor areas to remain cleaner for longer periods of time.

LOCALIZED PROTECTION: The RAP removes local odors and does not interfere with the central HVAC system. It is also effective in older buildings without air moving systems. The RAP 750 is designed for ceiling mounting.

LOW MAINTENANCE: The RaP 750 features pre- and final particulate filters in addition to Purafil's disposable modules for easy replacement.

LOCAL SERVICE: Purafil's factory-trained, local representatives can provide in-depth technical assistance and a comprehensive service program.

STANDARD FEATURES:

- Dry-scrubbing media manufactured by Purafil, Inc.
- Full particulate filtration
- 115 Volt, 60 Hz fan
- Dual speed controller
- Sound level: RAP 750 - 55 dbA
- Constructed of galvanized metal
