Press Release: Chinese Environmental Protection

Doraville, GA, United States – Purafil is proud to protect people, processes and environments with our air filtration systems. We remove dust, pollen, odors, harmful gases, and bacteria from the air.

1. *Which influence/ outcome do you expect for your products regarding the tightened version of the Chinese Environmental Protection Law that came into force on January 1, 2015?*

Purafil appreciates the most recent version of the Chinese Environmental Protection Law. Since 1969, our purpose has been to improve indoor air quality. Purafil's current product range supports the environmental improvement through real-time assessment with our monitors and the eradication of harmful gases with our chemical filtration. Empowered by a sense of caring, Purafil recently launched an air purifier to protect people against the effects of air pollution.

2. *For which industries and/ or for which air pollutants are your products particularly suitable for?*

Purafil is active in the residential, commercial, industrial, and wastewater markets.

We remove:

- Particulate matter (PM): PM-10, PM-2.5, dust, pollen
- 230 types of gases, such as Nox, SOx, CO₂, VOC, formaldehyde, nitrogen dioxide (NO₂), ozone (O₃), ammonia, SO₂, H₂S, chlorine, SO₂, H₂S, mercury
- Bacteria, fungus and virus

“Our culture of creative collaboration inspires a never-ending stream of powerful technologies that make life better in seventy countries,” said Patrick Mazzariol, VP Sales & Marketing. “Ultimately, this is about protecting people, process and environments while maintaining the highest degree of performance to gain customers loyalty for life.”

About Purafil
