Press Release: Newest Class of Active Air Monitoring Instruments

Doraville, GA, United States – Purafil is pleased to announce the launch of the newest product in our line of active air monitoring instruments, the OnGuard 4000. Through our commitment to innovation and best-in-class products, we optimized the existing OnGuard 3000. The most notable improvement allows customers to monitor corrosion levels in real-time from anywhere via Ethernet.

OnGuard 4000 Key Features:

- Measures corrosion, temperature, and relative humidity on a continual basis
- Data accessible from any location with three ways to connect
- Data alerts via email notifications
- LCD screen displays initial setup and readings
- Readings measured based on ISA Standard S71.04-2013

“We have compiled a complete launch package for our representatives containing an array of details for this advanced technology,” said Patrick Mazzariol, Vice President, Sales & Marketing. “Our ultimate concern is to protect people, processes, and environments with the highest degree of performance available.”

About Purafil

At Purafil, our sense of care is essential to the way we work. Since 1969, we engineer revolutionary products that set new standards in our industry. We are inspired to create a better world. For more information, visit www.purafil.com
