## **Press Release: Honeywell Highlights Purafil as Solution for Combating Electronic Corrosion**

Doraville, GA, United States – Purafil was recommended as a source of chemical filtration by Honeywell Process Solutions in a recently published white paper. Honeywell's white paper, [The Environment in Control and Equipment Rooms: How Important is It, and What to Look For](#)," addresses the importance of the environmental conditions surrounding Honeywell's control systems and electronic equipment in combating electronic Corrosion, or eCorrosion.

Controlled environments containing critical electronic controls and equipment must be properly managed for successful system operation and reliability. Room air affected by airborne contaminants, including particulates and damaging gases, along with temperature and humidity, is conducive to the accumulation of eCorrosion. Authors Jenny Bowman and Robert A. Zajko, P.E., state, "We recommend the chemical filtration be handled by a 3<sup>rd</sup> party, such as Purafil. Real time, active and passive monitors, are available to help monitor the effectiveness of chemical filtration. Optimized filtration can be monitored using either Purafil's On-Guard systems, or reactivity monitoring, including silver and copper coupons."

Key Purafil Steps for eCorrosion control:

- Assess the environment using [Corrosion Classification Coupons and Coupons+](#)
- Eradicate contaminants with [Purafil Media](#) and [Purafil Scrubbers for Corrosion](#)
- Monitor the solution for proper maintenance > [OnGuard 3000 and OnGuard 4000](#)

"Purafil's state-of-the-art laboratory assists customers in classifying the level of air quality in each individual environment. Every year, we take pride in conducting thousands of analyses in twelve different languages," said Patrick Mazzariol, Vice President of Sales and Marketing. "In line with our dedication to customer service, we are able to offer custom-tailored chemical media solutions for every environment, for a better quality of air."

### **About Purafil**

At Purafil, our passion and purpose is to improve the lives we touch. Since 1969, we engineer revolutionary products that set new standards in our industry to protect people, processes, and environments. We are inspired to create a better world.
