**Purafil Announces New Upgrades
MediaPIK™ Version 2.1 Analysis Software**

DORAVILLE, Ga.—Purafil, Inc., the leading manufacturer of air filtration systems for the removal of odors and gaseous pollutants, announces Purafil MediaPIK™ version 2.1, Purafil's unique chemical analysis software program created to assist customers in identifying the appropriate type and quantity of Purafil media needed for an application. The improved version replaces the recently expired Purafil MediaPIK™ 2.0 version. Purafil MediaPIK™ version 2.1 is a one-of-a-kind software program, which offers step-by-step methods and provides comprehensive information about gases present in various applications, estimates media consumption for applications, converts airflows and concentrations and prints a report of the users' session.

Purafil's internally designed MediaPIK™ chemical analysis software is an excellent depiction of the Purafil difference. Purafil invests in the continuous improvement of the Purafil MediaPIK™ program as part of its ISO 9001:2000 Continuous Improvement Program. The updated Purafil MediaPIK™ version 2.1 expires December 31, 2008.

For 40 years, Purafil has developed air cleaning systems that eliminate, control and provide real-time monitoring of corrosive, odorous, hazardous and toxic gases. Purafil maintains nearly 20,000 installations in cleanroom, commercial, industrial, preservation and water-wastewater treatment settings worldwide.
